

☐ The OA All Polypropylene Oil Removal Filter Bag

The perfect answer for removing trace oil and grease from an industrial stream of aqueous-based fluids

Bag can be designed to remove from 2 to 161b. of oil by increasing layers or adding strips which add to the surface area and increase efficiency, structural strength, and filter life.

OA Bags are designed with a cover for the prevention of fiber migration and include reinforced lift handles to facilitate its removal. If waste storage is a problem, the OA Bag can be completely disposed of by Incineration.

The Ideal oil removal system is the OA bag as a pre-filter and a high-efficiency bag as the final polish filter.

Features

- Micron rated and able to remove oil from aqueous based fluids.
- Standard with reinforced handles for easy removal.
- Maximum oil absorption with minimum pressure drop.
