Rosedale® DF Series

**ROSEDALE®
PRODUCTS INC.**

Separation, Filtration, & Purification Technology.™

Rosedale® DF Series

The Rosedale® DF Series Filter Bags have up to 4X the dirt holding capacity of standard bags at the equivalent micron ratings. Rosedale® DF Series bags are easy to install and remove, and require less room in storage and disposal. Because the dirt is caught inside the bag, contaminant wash off downstream associated with exterior surface loading filter cartridges is avoided. Rosedale® DF Series bags produce excellent results when used as a pre-filter for membrane filtration and other fine filters.

SPECIFICATIONS

- Available in #1 and #2 sizes
- Removal Ratings (microns):
1, 5, 10, 25, 50, 100, 200 Nominal
- Maximum Operating Temperature:
Polypropylene 180°F / 82°C
Polyester 300°F / 140°C
- Maximum Differential Pressure:
35 psid @ 68°F (1.03 bar @ 20°C)
- Recommended Change-Out Differential Pressure:
20 psid @ 68°F (.83 bar @ 20°C)
- Maximum Flow Rate:
75 gpm (#1 size) or 150 gpm (#2 size)
- Recommended Flow Rate:
40 gpm (#1 size) or 80 gpm (#2 size)
- 60% more media compared to standard bags (reduced hold-up volume which minimizes product waste and waste management fees)
- Rosedale® DF Series bags lasts up to 4X longer than standard bags
- Rosedale® DF Series bags fit in single and multi-bag filter housings (contact us for all options)

APPLICATIONS

- Inks, paints, and coatings
- General chemicals (broad chemical compatibility)
- Oil and gas
- Electronics
- Lubricants
- Food and beverages
- Water treatment

CONSTRUCTION

- All welded construction for high efficiency
- Thermal finish on media to eliminate fiber shredding
- All component materials of the Rosedale® DF Series polypropylene (POG) bags are compliant with the FDA CFR Title 21, Section 177.1520

TYPE	SURFACE AREA	VOLUME	NOMINAL SIZE
DF #1	≈3.5 FT2	≈.7 GAL.	7" X 14.25"
DF #2	≈7.0 FT2	≈1.4 GAL.	7" X 27.5"
STD. #1	≈2.2 FT2	≈2.25 GAL.	7½" X 16.5"
STD. #2	≈4.4 FT2	≈4.5 GAL.	7½" X 32"

Note:
Variables such as solids amounts, type, micron retention, viscosity, and other process information should be considered to filter sizing. Consult factory.

Rosedale® DF Series Bags

Rosedale® DF Series bags consist of two tubular layers that are combined together with thermal and ultrasonic welding. Each filter layer utilizes a gradient density design, enhancing flow rate, solids loading, and efficiency. The downstream side of the filter layers are glazed or singed to prevent fiber migration. The molded DF bag flange comes in Polypropylene and Polyester and ensures a positive seal with the filter housing. Closed “R” Cap styles fit Rosedale 8-30, NCO8-30 and Multi-Bag Series vessels. Open “C” Cap Styles fit Rosedale DF8-30 Series vessels.

Custom Design

We can build anything from simple modifications on standard housings to customer-specified skid-mounted filtration systems. These can incorporate filters, strainers, separators, controllers, sensors, and automated operations.

Rosedale has a long history of innovative filtration designs. They are as simple as our Model 4 housing or as complex as our multistation automatic backwashing filtration systems. Using our expertise, we work with our clients to manufacture systems that meet their needs. Some of our standard models started out as solutions to a client's need, such as the duplex and multiplex filters or convertible housings.

Welcome to the future of liquid filtration technology.

**ROSEDALE[®]
PRODUCTS INC.**

Separation, Filtration, & Purification Technology.™

Rosedale Products, Inc. is a leading technology developer in the field of liquid filtration systems and waste minimization products for customers around the world. With more than 50 years of experience, Rosedale offers an exceptional product line that includes high-performance filtration solutions for multiple industries. Rosedale technicians help customers find the best, most cost-effective approaches to their filtration needs.

Rosedale's product line sets the industry standard in versatility and reliability and includes bag and cartridge filters, basket strainers, automatic back washing filters, filter cartridges, and many special application products. Together with ongoing consulting, troubleshooting, and support from our team of in-house experts, Rosedale provides comprehensive solutions for every critical industry filtration need. Rosedale manufactures industrial filtration products for virtually any industry where liquid and gas flows are present.

We have a vast product line that suits many needs, as well as the flexibility to customize standard products. Our sales staff has knowledge of many industrial practices, giving customers the confidence that their filter solution is the best available for their specific need. Our most popular products are bag filters, pleated cartridge filters, and basket strainers.
